Semi Automatic Dispenser

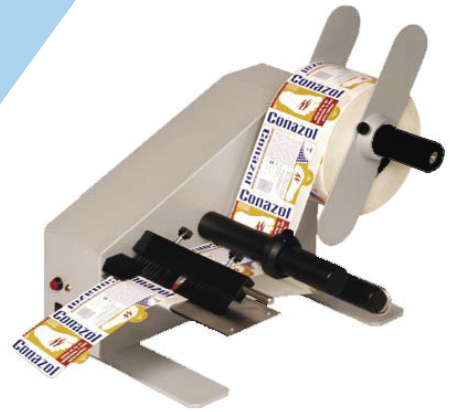

ALpeel was developed to suit industrial applications. It is a semi-automatic dispenser for self-adhesive roll format labels. Fully metalised, it is easy to operate, flexible and suitable for any type of label commonly in use.

ALpeel is available in 2 widths:  
up to 100 mm - up to 200 mm (Maximum label leading edge)

The roll holder can be adapted to any core type and can accept rolls up to 300 mm in diameter, thus offering long operation autonomy. The labels are read by two self-learning microprocessor controlled sensor . They can automatically identify the difference in transparency existing between the label and the backing paper, presenting the label on the peeler bar almost fully peeled off for easy removal.

After the removal of a label from the paper support, the next label will peel out automatically. Furthermore, the control card to stop the motor rotation when the roll is finished or in case of paper tear, accompanied by an acoustic error signal. Also available is an electromechanical detection device for transparent labels and a pre-selection counter. The battery operated version makes it possible to work for about 4 hours without mains power. Supply voltage 230 V or 115 V on request.

The battery operated dispenser does not require a separate power supply unit as the battery charger is mounted internally alongside the control card.

ALpeel 200: Width up to 200mm in label width

ALpeel with micro switch sensor for transparent and circular labels

## Technical Specifications

	100	200
Label Width	15-100 mm	15-200 mm
Label Length	15-600 mm	15-600 mm
Speed	10-15 m/m	10-15 m/m
Roll diameter	300 mm	300 mm
Core diameter	38-110 mm	38-110 mm
Supply voltage	230vac-50Hz	230vac-50Hz
Power consumption	30W	30W
Dimensions	330 x 410 x 370 (H)	330 x 410 x 370 (H)
Weight	9.7 Kg	11 Kg
